Node

Experience

ICEYE, Helsinki (FI) | Oct '23–Present

Sr. UI/UX Designer

- Designed the UI/UX for the **ICEYE Tactical Access Portal, a geo-spatial interface** enabling users book satellite capacity to order and access Earth observation data.
- Created wireframes, prototypes, and visual designs for internal tools used in tracking and delivering time-sensitive customer orders of **satellite images**.

United Nation Development Programme, New York (Contract, Remote) | Nov '21–Present

Data Visualization Analyst

- Designing, developing and maintaining **data platform for UNDP** *(data.undp.org)*, achieving over **1 million page visits** and attracting more than **225,000 unique users**.
- Developed **UNDP Visualization Library** *(dataviz.design.undp.org)*, reusable visualization library used to create dynamic interactive visualizations and dashboards. The library has with built-in support for accessibility, responsiveness, theming, and multi-language support (including RTL languages).
- Developed **React based UNDP Design System** *(react.design.undp.org)*, a React-based implementation of the UNDP Design System, built with ShadCN UI and Tailwind CSS.
- Designed and developed **80+ dashboards, interactive maps, data visualization, and data stories** across various development themes.
- Lead a project to design and develop **data visualization design guidelines** and tools to develop and design data visualizations for UNDP.

Aiven, Helsinki (FI) | Aug '21–Oct '23

Sr. UX Designer

- Developed wireframes, interactive prototypes, and visual designs for **Aiven Platform, a SaaS solution** to manage and govern every aspect of users' cloud data infrastructure.
- Conducted user research and translated findings into user personas, journey maps, and design requirements to inform the design process.
- *Responsible for designing a delightful developer experience for:*
  - **Clickhouse for Aiven**: A Fully managed cloud database.
  - **Apache Flink for Aiven**: A Fully managed data streaming service.
  - **Aiven Klaw**: A fully self-serviced solution For managing Kafka topics and connectors.

Futurice, Helsinki (FI) | Aug '16–Aug '21

Sr. Designer / Designer

Designed information architecture, data visualization, wireframes, user journey and flows, and UI/UX for:

- **OnWatch Scout** *(for MacGregor Oy)*: A digital solution to boost equipment uptime by monitoring performance, optimizing maintenance schedules, and providing easy access to manuals. Designed visual interfaces with equipment illustrations to analyze component conditions and predict maintenance needs.
- **VR Ohjus** *(for VR Group)*: A tool for visualizing real-time train data in Helsinki to enhance rail service reliability. Created real-time tube maps and innovative data visualizations to support location-based and scheduling decisions.
- **Oma Fingrid** *(for Fingrid Oyj)*: A data-driven application providing electricity companies with live data on usage and production. Designed interactive maps and graphs for visualizing the electricity grid, power generation/consumption, and financial data.
- **Fortum Apollo** *(for Fortum Oyj)*: A forecasting tool for mid-term hydropower forecasts and pricing. Created intuitive graphs and reports, and assisted in developing a visual templating language for customizable graphs and reports.

Swedish (intermediate)

Academics

Aalto University School of Arts, Design, and Architecture, Finland

M.A. | Visual Communication Design (Focus on Information Design) | 2014–2018

Indian Institute of Technology Bombay (IITB), India

B. Tech + M. Tech | Electrical Engineering | 2007–2012

Projects

Academic Projects

VR-Viz | Master's Thesis Project | Jan–Nov '18

Supervisor: **Prof. Rupesh Vyas | Aalto University, Finland**

Developed VR-Viz, an open-source JavaScript library, and visualization system for creating data visualization and maps in 3D and virtual reality on the web

- Examples and documentation can be found *here (vr-viz.mustafasaifee.dev)*.
- Featured in O'Reilly's book: **Creating Augmented and Virtual Realities**.
- Shortlisted for the **Information is Beautiful award 2019**.

Client Projects

UNDP Data Futures Exchange | *https://data.undp.org/*
Client: UNDP
Role: UI/UX design, data visualization, front-end development, Project Management

UNDP SDG Push Diagnostics | *https://sdgdiagnostics.data.undp.org/*
Client: UNDP
Role: UI/UX design, data visualization, front-end development, data analysis

UNDP Data Viz Library | *https://dataviz.design.undp.org/*
Client: UNDP
Role: Data visualization, front-end development

UNDP Design System for React | *https://react.design.undp.org/*
Client: UNDP
Role: Front-end development

Personal Projects

Air Quality In India (data story) | *https://air-quality-in-india.mustafasaifee.dev/*
Role: Data storytelling, data visualization, front-end development

COVID Dashboard | *https://covid19.mustafasaifee.dev/*
Role: Data visualization, front-end development

Gendered Toponyms | *https://gendered-toponyms.mustafasaifee.dev/*
Role: Data visualization, front-end development

India Lok Sabha Election Results | *https://loksabharesults.mustafasaifee.dev/*
Role: Visual design, data visualization, front-end development, data analysis
