

Product designer and design engineer with 10+ years of experience building **data-heavy tools** for expert users — transforming dense technical requirements into coherent, self-service experiences across **B2B platforms, developer tooling**, and **mission-critical operational workflows**.

SKILLS

UI/UX Design
Data Visualization
Design Systems
Information Architecture
Information Design
Front-End Dev.
User Research

SOFTWARE

Design

Figma
Adobe CC

Front-End

React.js
TypeScript
ShadCn
TailwindCSS

Data Viz. & Geospatial

D3.js
Mapbox.js
Leaflet.js
Three.js
Tableau
PowerBI

Back-End

Python
Node

WORK EXPERIENCE

Data Visualization Analyst (Product Lead) | **UNDP**, New York (Remote) Nov '21–Present

Leading a cross-functional team of designers, analysts, and developers to design and build UNDP's (United Nations Development Programme) data ecosystem — spanning **data applications, analytics products**, and **storytelling** experiences.

- Leading the end-to-end product development of UNDP's flagship data platform — **Data Futures Exchange** (data.undp.org); across user research, product strategy, UX design, and implementation, attracting **1M+ page visits** and **225K+ unique users**.
- Designed and developed the **UNDP Visualization Library** (dataviz.design.undp.org) — a React-based **data visualization framework** used across 50+ UNDP data projects.
- Architected and led the **UNDP Design System for React** (react.design.undp.org) — **component library and design system** enabling consistent UI delivery across UNDP's digital products.
- Serving as the **primary technical and product liaison** for UNDP stakeholders to translate complex priorities into actionable briefs and drive team delivery workflows.
- Provided **design consultation** for **UNDP Chat** — UNDP's internal generative AI platform, identifying usability improvements and refining key interaction flows.

Sr. UI/UX Designer | **ICEYE**, Helsinki (FI)

Oct '23–Jun '26

Sole designer on a cross-functional team building mission-critical **satellite capacity booking and tracking tools**.

- Led end-to-end design of the **ICEYE Tactical Access Portal** — from discovery and user research to shipped product — resulting in **5+ enterprise customers** migrating from legacy tasking workflows within 6 months of the launch.
- Researched and designed **geospatial** ordering and tracking workflows for Earth observation data through iterative user research and interviews — enabling **urgent imagery requests without specialist expertise**.
- Built and maintained a scalable **design system** that improved cross-product consistency and reduced design-to-development handoff time.

Sr. UX Designer | **Aiven**, Helsinki (FI)

Aug '21–Oct '23

Designed **developer experience (DX) tooling** for a **cloud data infrastructure platform**, shaping end-to-end UX through research with developers and data engineers to define **personas, journeys**, and **core interaction patterns**.

- Owned end-to-end UX for **Aiven for ClickHouse** — from **user research** with data engineers to **designing workflows** for deployment, query testing, and access management in a unified self-service flow.
- Designed **Aiven for Apache Flink** — creating intuitive onboarding and workflow patterns that made a **highly technical product approachable** without compromising its advanced capabilities.
- Owned UX for **Aiven Klaw** — a **self-service Kafka topic management tool** — surfacing complex governance logic in a clear, usable interface.

EDUCATION

Aalto University

M.A. in Visual
Communication
Design

Aug '14–Nov '18

Indian Institute of Technology Bombay

B. Tech. + M. Tech.
(Dual degree) in
Electrical Engineering

Aug '07–Jul '12

LANGUAGE SKILLS

English

Hindi

Swedish (B1/B2)

Sr. Designer (promoted from Designer) | **Futurice**, Helsinki (FI)

Aug '16–Aug '21

Design lead across a portfolio of complex **B2B** client products — scoping, discovering, and delivering tools for expert operators in high stakes environments.

OnWatch Scout | MacGregor Oy

- Sole designer for an **offshore vessel equipment predictive maintenance platform**, translating **user interviews with maritime crews** into visual interfaces and diagnostic illustrations to monitor component conditions and predict failures.

VR Ohjus | VR Group

- Designed **real-time train data visualizations** for Helsinki's rail network, iterating with dispatchers to build live tube maps that display simultaneous positional and delay data, resulting in reduced cognitive load under time pressure for users.

Oma Fingrid | Fingrid Oy

- Led the design of a **data-driven electricity grid monitoring platform**, utilizing **interactive maps and graphs** to surface tailored, real-time usage, generation, and consumption data for users ranging from grid operators to financial analysts.

Fortum Apollo | Fortum Oy

- Designed a **hydropower forecasting tool** for pricing decisions, collaborating with analysts to co-develop a **visual templating system** that enabled them to customize graph and report layouts without designers involvement.

KEY PROJECTS

VR-Viz | vr-viz.mustafasaiffee.dev | **Aalto University (Master's Thesis Project)**

An open-source library, and visualization system for creating data visualization and maps in 3D.

- Featured in O'Reilly's book: **Creating Augmented and Virtual Realities**.
- Shortlisted for the **Information is Beautiful award 2019**.

UNDP Data Visualization Library | dataviz.design.undp.org | **UNDP**

Role: Data visualization, development

UNDP Design System for React | react.design.undp.org | **UNDP**

Role: Development

Women's Representation in Judiciary | womeninjudiciary.undp.org | **UNDP**

Role: Data visualization, front-end development

SDG Push Diagnostics | sdgdiagnostics.data.undp.org | **UNDP**

Role: Data visualization, front-end development, data analysis

Gendered Toponyms | gendered-toponyms.mustafasaiffee.dev | **Personal project**

Role: Data visualization, front-end development, data analysis
